

CORRIGENDA

Corrigendum to Regulation (EC) No 881/2004 of the European Parliament and of the Council of 29 April 2004 establishing a European railway agency (Agency Regulation)*(Official Journal of the European Union L 164 of 30 April 2004)*

Regulation (EC) No 881/2004 should read as follows:

**REGULATION (EC) No 881/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
of 29 April 2004
establishing a European railway agency
(Agency Regulation)**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 71(1) thereof,

Having regard to the proposal from the Commission ⁽¹⁾,Having regard to the opinion of the European Economic and Social Committee ⁽²⁾,Having regard to the opinion of the Committee of the Regions ⁽³⁾,Acting in accordance with the procedure laid down in Article 251 of the Treaty ⁽⁴⁾, in the light of the joint text approved by the Conciliation Committee on 23 March 2004,

Whereas:

- (1) The progressive establishment of a European railway area without frontiers requires Community action in the field of the technical regulations applicable to railways with regard to both the technical aspects and the safety aspects, the two being inextricably linked.
- (2) Council Directive 91/440/EEC of 29 July 1991 on the development of the Community's railways ⁽⁵⁾ provides for

progressively opening up rights of access to the infrastructure to any licensed Community railway undertakings which wish to operate goods services.

- (3) Council Directive 95/18/EC of 19 June 1995 on the licensing of railway undertakings ⁽⁶⁾ provides that all railway undertakings must hold a licence and that a licence issued in a Member State shall be valid throughout the Community.
- (4) Directive 2001/14/EC of the European Parliament and of the Council of 26 February 2001 on the allocation of railway infrastructure capacity and the levying of charges for the use of railway infrastructure and safety certification ⁽⁷⁾ establishes a new framework with the aim of creating a European railway area without frontiers.

- (5) The technical and operational differences between the railway systems of the Member States have compartmentalised the national rail markets and prevented dynamic development of this sector on a European scale. Council Directive 96/48/EC of 23 July 1996 on the interoperability of the Trans-European high-speed rail system ⁽⁸⁾ and Directive 2001/16/EC of the European Parliament and of the Council of 19 March 2001 on the interoperability of the Trans-European conventional rail system ⁽⁹⁾ define essential requirements and establish a mechanism for defining mandatory technical specifications for interoperability.

Legislative Resolution of the European Parliament of 22 April 2004 and Decision of the Council of 26 April 2004.⁽⁵⁾ OJ L 237, 24.8.1991, p. 25, Directive as amended by Directive 2001/12/EC of the European Parliament and of the Council (OJ L 75, 15.3.2001, p. 1).⁽⁶⁾ OJ L 143, 27.6.1995, p. 70, Directive as amended by Directive 2001/13/EC of the European Parliament and of the Council (OJ L 75, 15.3.2001, p. 26).⁽⁷⁾ OJ L 75, 15.3.2001, p. 29, Directive as amended by Commission Decision 2002/844/EC (OJ L 289, 26.10.2002, p. 30).⁽⁸⁾ OJ L 235, 17.9.1996, p. 6. Directive as amended by Regulation (EC) No 1882/2003 of the European Parliament and of the Council (OJ L 284, 31.10.2003, p. 1).⁽⁹⁾ OJ L 110, 20.4.2001, p. 1.

- (6) Simultaneous pursuit of the goals of safety and interoperability requires substantial technical work which must be led by a specialised body. That is why it is necessary to create, within the existing institutional framework and with respect for the balance of power in the Community, a European agency responsible for railway safety and interoperability (hereinafter referred to as the Agency). The creation of such an agency will provide a means of considering the safety and interoperability goals for the European rail network jointly and with a high level of expertise and in this way contributing to revitalising the railways and to the general objectives of the common transport policy.
- (7) In order to promote the establishment of a European railway area without borders and to help revitalise the railway sector while reinforcing its essential advantages in terms of safety, the Agency should contribute to the development of a genuine European railway culture and form an essential tool of dialogue, consultation and exchange between all the actors in the railway sector, having due regard for their individual competences.
- (8) Directive 2004/49/EC of the European Parliament and of the Council of 30 April 2004 on safety on the Community's railways (Railway Safety Directive) ⁽¹⁾ provides for the development of common safety indicators, common safety targets and common safety methods. Development of these tools requires independent technical expertise.
- (9) In order to facilitate the procedures for issuing safety certificates to railway undertakings, it is essential to develop a harmonised format for safety certificates and a harmonised format for applications for safety certificates.
- (10) The Railway Safety Directive provides for examination of national safety measures from the point of view of safety and interoperability. To this end, an opinion based on independent and neutral expertise is essential.
- (11) In the field of safety, it is important to ensure the greatest possible transparency and an effective flow of information. An analysis of performances, based on common indicators and linking all players in the sector, does not yet exist and such a tool should be introduced. As regards statistics, close collaboration with Eurostat is necessary.
- (12) The national railway safety organisations, regulators and other national authorities should be able to request an independent technical opinion when they require information concerning several Member States.
- (13) Directive 2001/16/EC provides that a first group of technical specifications for interoperability (TSIs) is to be drawn up not later than 20 April 2004. The Commission has given a mandate to carry out this work to the European Association for Railway Interoperability (AEIF), which brings together the manufacturers of railway equipment and the infrastructure managers and operators. Steps should be taken to preserve the experience built up by professionals from the industry in the context of the AEIF. The continuity of the work and the development of the TSIs over time requires a permanent technical framework.
- (14) The interoperability of the Trans-European network should be enhanced and the new investment projects chosen for support by the Community should be in line with the objective of interoperability set in Decision No 1692/96/EC of the European Parliament and of the Council of 23 July 1996 on Community guidelines for the development of the Trans-European transport network ⁽²⁾.
- (15) In order to ensure continuity, the working parties to be set up by the Agency should rely as appropriate on the composition of the AEIF, supplemented by additional members.
- (16) Rolling stock maintenance is an important part of the safety system. There is no genuine European market for the maintenance of rail equipment owing to the lack of a system for certification of maintenance workshops. This situation adds to the costs for the sector and results in journeys without loads. A European certification system for maintenance workshops should therefore gradually be developed.
- (17) The vocational competences required for train drivers are a major factor in both safety and interoperability in Europe. They are also a precondition for the free movement of workers in the railway industry. This question should be tackled with respect to the existing framework for social dialogue. The Agency should provide the technical support necessary in order to take account of this aspect at European level.
- (18) Registration is first and foremost an act of recognition of the capability of rolling stock to operate under specified conditions. The registration should be transparent and non-discriminatory and fall within the competence of the public authorities. The Agency should provide technical support in order to establish a system for registration.

⁽²⁾ OJ L 228, 9.9.1996, p. 1. Decision as amended by Decision No 1346/2001/EC (OJ L 185, 6.7.2001, p. 1).

- (19) In order to ensure the greatest possible transparency and equal access for all parties to relevant information, the documents envisaged for the interoperability process should be accessible to the public. The same applies to licences and safety certificates. The Agency should provide an efficient means of exchanging this information.
- (20) Promotion of innovation in the field of railway safety and interoperability is an important task which the Agency should encourage. Any financial assistance provided within the framework of the Agency's activities in this respect should not lead to any distortion in the relevant market.
- (21) In order to perform its tasks properly, the Agency should have legal personality and an autonomous budget funded mainly through a contribution by the Community. In order to ensure independence in its daily management and in the opinions and recommendations which it issues, the Agency's Executive Director should have full responsibility and the Agency's staff should be independent.
- (22) In order to ensure effectively the accomplishment of the functions of the Agency, the Member States and the Commission should be represented on an Administrative Board vested with the necessary powers to establish the budget, verify its execution, adopt the appropriate financial rules, establish transparent working procedures for decision-making by the Agency, approve its work programme, adopt its budget, define a policy for visits to the Member States and appoint the Executive Director.
- (23) In order to guarantee the transparency of the Administrative Board's decisions, representatives of the sectors concerned should attend its deliberations, but without the right to vote, that right being reserved to the representatives of public authorities who are answerable to the democratic control authorities. The representatives of the sector should be appointed by the Commission on the basis of their representativeness at European level for railway undertakings, infrastructure managers, railway industry, workers unions, passengers and freight customers.
- (24) The Agency's work should be transparent. Effective control by the European Parliament should be ensured and, to this end, the European Parliament should have the possibility of hearing the Executive Director of the Agency. The Agency should also apply the relevant Community legislation concerning public access to documents.
- (25) Over the past years, as more decentralised agencies have been created, the budgetary authority has looked to improve transparency and control over the management of the Community funding allocated to them, in particular concerning the budgetisation of the fees, financial control, power of discharge, pension scheme contributions and the internal budgetary procedure (code of conduct). In a similar way, Regulation (EC) No 1073/1999 of the European Parliament and of the Council of 25 May 1999 concerning investigations conducted by the European Anti-Fraud Office (OLAF) ⁽¹⁾ should apply without restriction to the Agency, which should accede to the Interinstitutional Agreement of 25 May 1999 between the European Parliament, the Council of the European Union and the Commission of the European Communities concerning internal investigations by the European Anti-Fraud Office ⁽²⁾.
- (26) Since the objectives of the action proposed, namely to establish a specialised body to formulate common solutions on matters concerning railway safety and interoperability, cannot be sufficiently achieved by the Member States by reason of the joint nature of the work to be done, and can therefore be better achieved at Community level, the Community may adopt measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives,

HAVE ADOPTED THIS REGULATION:

CHAPTER 1

PRINCIPLES

Article 1

Establishment and objectives of the Agency

This Regulation establishes a European railway agency, hereinafter referred to as the Agency.

The objective of the Agency shall be to contribute, on technical matters, to the implementation of the Community legislation aimed at improving the competitive position of the railway sector by enhancing the level of interoperability of railway systems and at developing a common approach to safety on the European railway system, in order to contribute to creating a European railway area without frontiers and guaranteeing a high level of safety.

⁽¹⁾ OJ L 136, 31.5.1999, p. 1.

⁽²⁾ OJ L 136, 31.5.1999, p. 15.

In pursuing these objectives, the Agency shall take full account of the process of enlargement of the European Union and of the specific constraints relating to rail links with third countries.

The Agency shall have sole responsibility in the context of the functions and powers assigned to it.

Article 2

Type of acts of the Agency

The Agency may:

- (a) address recommendations to the Commission concerning the application of Articles 6, 7, 12, 14, 16, 17 and 18;

These working parties shall take as a basis, on the one hand, the expertise built up by professionals from the railway sector, in particular the experience gained by the European Association for Railway Interoperability (AEIF), and, on the other hand, the expertise of the competent national authorities. The Agency shall ensure that its working parties are competent and representative and that they include adequate representation of those sectors of the industry and of those users which will be affected by measures which might be proposed by the Commission on the basis of the recommendations addressed to it by the Agency. The work of the working parties shall be transparent.

Whenever the work provided for in Articles 6, 12, 16 and 17 has a direct impact on the working conditions, health and safety of workers in the industry, representatives from the workers' organisations shall participate in the relevant working parties.

2. The Agency shall forward the adopted work programme to the representative bodies from the railway sector acting on a European level. The list of these bodies shall be drawn up by the Committee referred to in Article 21 of Directive 96/48/EC. Each body and/or group of bodies shall forward to the Agency a list of the most qualified experts mandated to represent them in each working party.

3. The national safety authorities defined in Article 16 of the Railway Safety Directive shall appoint their representatives for the working parties in which they wish to participate.

4. The Agency may, if necessary, add to the working parties independent experts recognised as competent in the field concerned.

5. The working parties shall be chaired by a representative of the Agency.

Article 4

Consultation of the social partners

Whenever the work provided for in Articles 6, 7, 12, 16 and 17 has a direct impact on the social environment or working conditions of workers in the industry, the Agency shall consult the social partners within the framework of the sectoral dialogue committee set up pursuant to Decision 98/500/EC⁽¹⁾.

These consultations shall be held before the Agency submits its recommendations to the Commission. The Agency shall take due account of these consultations, and shall, at all times, be available to expound on its recommendations. The opinions expressed by the sectoral dialogue committee shall be forwarded by the Agency to the Commission and by the Commission to the committee referred to in Article 21 of Directive 96/48/EC.

Article 5

Consultation of rail freight customers and passengers

Whenever the work provided for in Articles 6 and 12 has a direct impact on rail freight customers and passengers, the Agency shall consult the organisations representing them. The list of organisations to be consulted shall be drawn up by the committee referred to in Article 21 of Directive 96/48/EC.

These consultations shall be held before the Agency submits its proposals to the Commission. The Agency shall take due account of these consultations, and shall, at all times, be available to expound on its proposals. Article 8

National safety rules

1. At the request of the Commission, the Agency shall carry out a technical examination of the new national safety rules submitted to the Commission in accordance with Article 8 of the Railway Safety Directive.

2. The Agency shall examine the compatibility of the above-mentioned rules with the CSMs defined by the Railway Safety Directive and with the TSIs in force. The Agency shall also examine whether these rules enable the CSTs defined by the said Directive to be achieved.

3. If, after taking account of the reasons given by the Member State, the Agency considers that any of these rules either is incompatible with the TSIs or the CSMs or does not allow CSTs to be reached, it shall submit an opinion to the Commission within two months of transmission of the rules to the Agency by the Commission.

Article 9

Monitoring of safety performance

1. The Agency shall establish a network with the national authorities responsible for safety and the national authorities

responsible for the investigations provided for by the Railway Safety Directive in order to define the content of the common safety indicators listed in Annex I to that Directive and to collect relevant data on railway safety.

The first such report shall be published during the Agency's third year of operation.

3. The Agency shall draw on the data collected by Eurostat and shall cooperate with Eurostat to avoid any duplication of work and to ensure methodological consistency between the common safety indicators and the indicators used in other modes of transport.

Article 10

Technical opinions

1. The national regulatory bodies referred to in Article 30 of Directive 2001/14/EC may request a technical opinion from the Agency concerning the safety-related aspects of matters drawn to their attention.

Article 15

Interoperability of the trans-European network

At the request of the Commission, the Agency shall examine, from the point of view of interoperability, any railway infrastructure project for which Community financial support is requested. The Agency shall give an opinion on the conformity of the project with the relevant TSIs within two months of the request. This opinion shall take fully into account the derogations provided for in Article 7 of Directive 96/48/EC and of Directive 2001/16/EC.

COMMISSION STATEMENT

The Commission recalls its December 2002 communication on a framework for European regulatory agencies and its proposal for a Regulation establishing the European Railway Agency. The Commission believes, in accordance with European Parliament resolution of 13 January 2004 on the abovementioned communication, that a Board of limited size with members appointed by the Community's executives would ensure a better functioning of the Agency in an enlarged EU. In this respect, the Commission looks forward to receiving the Council's response to its communication on a framework for regulatory agencies. The Commission confirms its intention to present, when appropriate, a proposal on a framework for European agencies, which will also cover the composition of the Management Board.
